

SUMMARY

Experienced Full Stack Software Engineer holding a BSCS degree, known for providing creative solutions. Actively pursuing a challenging position within a progressive company to apply technical skills for advancement. Recognized for flexibility, teamwork, and a commitment to ongoing education. Eager to drive meaningful change and enhance performance.

SKILLS

- **Interest:** Web Development, Full Stack Developer, Frontend Development
- **Languages:** C/C++/C#, Python, HTML/CSS, JavaScript, PHP, SQL, Ruby, Assembly
- **Frameworks:** React.js, Node.js, Game Development, Ruby on Rails, laravel, MySQL, DBMS, Postgres, MongoDB
- **Tools:** Linux, Shell (Bash), Unity, VS code, MS Visual Studio, Gitlab.
- **Soft Skills:** Debugging, Problem-solving, Documentation, Effective Communication

Professional Experience

Software Engineer

at **Khired Networks** (Oct 2023 - present)

- Developed strong solutions to enhance frontend UI responsiveness and dashboards performance for Web Apps.
- Streamlined endpoints and APIs to enhance user experiences and boost system efficiency.
- Kept code clean and efficient on GitHub repositories to maintain project integrity and encourage collaboration.
- Conducted comprehensive testing, regularly updating primary repositories to meet high-quality standards.

PROJECTS

SmartWorkForce

[URL: smartworkforce.co.uk](https://smartworkforce.co.uk)

Skills: (React, Typescript, Laravel, Postgres)

- Partnered with the Khired Networks team for comprehensive development for Workforce Management Inc. (UK).
- Helped achieve 90% technology utilization, leveraging React, Redux, Laravel, and PostgreSQL.
- Instrumental in improving user experience through responsive designs, resulting in a 95% satisfaction rate.
- Engaged in bug detection and resolution, leading to the successful implementation of industry-specific features and a 300% increase in productivity.

Cara Connect

[URL: cara.khired.pk](https://cara.khired.pk)

Skills: (React.js, Node.js, Express.js, Postgres, React Apex Chart)

- A project at UCD (University College Dublin) aimed to present medical practices in user-friendly charts and graphs for comparing patients' data.
- The charts were improved to enhance readability and introduce interactivity for better result comparisons.
- Frontend readability was increased by 30% with successful outcomes.
- APIs were implemented and existing endpoints were enhanced to display optimized results.

EXPERTS HUBS

- Created a user-centered MERN stack interface that blends MongoDB and React to deliver dynamic experiences. Leveraged React's real-time capabilities to boost an AI-powered suggestion system. Managed user records and bootcamp sessions efficiently, capitalizing on React's modular design. Demonstrated advanced technology integration, emphasizing React, MongoDB, and MERN stack, showcasing adept project management in the final presentation.

EDUCATION

Bachelor of Science in Computer Science

Fast NUCES AUGUST 2019- JUNE 2023
